SUMMARY

Full-stack .NET developer and tech lead from Belgium, in Bangkok since 2024. Five years of C#, ASP.NET Core, React/Angular and Azure, mostly as a consultant joining client teams. Tech lead in a team of 4 developers on a white-label investment platform used by thousands of financial advisers; earlier, software for the association representing about 90% of Belgian pharmacies. Now Tech Lead Consultant at We Do Dev Work, leading a team of 5 developers across client projects.

SKILLS

Backend: C#, .NET 6, .NET 7, .NET 10, ASP.NET Core, ASP.NET Core MVC, Entity Framework Core, CQRS, MediatR, REST API, Web API, Unit Testing, Node.js

Cloud and data: Microsoft Azure, Azure DevOps, CI/CD, Supabase, SQL Server, Azure SQL, Git

Other: Xamarin.Forms (iOS and Android), Ionic, PHP, technical SEO

Frontend: SvelteKit, React, Angular, TypeScript, Blazor

Methodologies: Agile, Scrum, code review, AI-assisted development (shared SKILL.md standards), shared QA ownership

EXPERIENCE

Tech Lead Consultant, We Do Dev Work

Aug 2026 - Present

Bangkok, Thailand | .NET, Node.js, SvelteKit, Supabase, PHP

Lead a team of 5 developers across client projects and internal products at a 14-person Bangkok software company with Belgian roots.

- Review the team's pull requests and own the technical decisions.
- Single point of contact for clients on scope and technical choices: give them what they need to decide and keep client and team on the agreed outcome.
- Wrote the SKILL.md files that hold our coding standards and made them mandatory, so AI-generated code follows the same rules as hand-written code.
- Moved QA into the team's workflow: developers now share responsibility for quality instead of handing work over at the end.
- Advise RAS Security, a Belgian security-equipment distributor, and MadeIndonesia, a digital agency in Yogyakarta, on technical choices and SEO; contract PHP work for SD Creative Agency in the Netherlands.
- Build internal products: EngineeringScore, a website-audit tool that scores security, performance, SEO and accessibility, and the PAK PRIK online shop (Thai curry paste).

Full-Stack Developer and Tech Lead, Onify

Oct 2024 - Jul 2026

Bangkok (remote, for a client in Malaysia) | .NET 6, React, Azure, SQL Server

Developer and tech lead on Capital Platforms, a white-label investment platform used by thousands of financial advisers, as a remote consultant for a Malaysian client, placed by the agency Onify.

- Built features across stock, ETF and fund trading, report exports and portfolio monitoring.
- Tech lead in a team of 4 developers, working with a project manager and a QA engineer, and still writing code most days.

.NET Consultant, Cheops Technology

Mar 2024 - Aug 2024

Eeklo, Belgium | .NET, C#

Placed by the consultancy Cheops Technology (Kontich) at Victor Buyck Steel Construction in Eeklo, a builder of bridges and heavy steel structures.

- Worked on the company's internal logistics system.
- Left in August 2024 to move to Bangkok.

.NET Consultant, AllPhi

Sep 2021 - Feb 2024

Merelbeke, Belgium | C#, .NET, Angular, Xamarin

Consultant placed with clients in pharmacy, laboratory and home-services companies.

- **APB**, Belgian pharmacists' association (Aug 2023 - Feb 2024): Built UI components in ASP.NET Core MVC and Razor for the web application of the association representing about 90% of Belgian pharmacies, used by pharmacists and the public.
- **Primoris**, food-testing laboratory group, now with sites in 7 countries (Jan 2023 - May 2023): Fixed bugs and shipped features in the lab and office software (WPF, WinForms and Angular on .NET, deployed through Azure DevOps).
- **Innovation Center Daenens**, tech arm of a home-services group in Bruges (Apr 2022 - Sep 2022): Built an internal Xamarin.Forms app for iOS and Android that domestic workers across Belgium use to check schedules and payslips and to chat with head office. Wrote the functional specification with the client.
- **Traineeship** (Sep 2021 - Nov 2021): 3 months of .NET Core, CQRS, Entity Framework, Angular and React. Capstone at Febelco, a pharmaceutical wholesaler: an Ionic/Angular app that scans several medicine packages in one pass, a 23–30% performance gain over one at a time.

PHP Developer Intern, Signpost

Feb 2021 - Jun 2021

Lokeren, Belgium

Internship at an education-IT company in Lokeren.

- Maintained internal PHP software and its HTML/SCSS/JavaScript front end.

EDUCATION

HOGENT, Associate degree in Programming (graduaat), 2019 - 2021

VTI Lokeren, High school diploma

COURSES

- Azure Fundamentals preparation (LinkedIn Learning, 2024)
- Azure DevOps CI/CD with Visual Studio (Coursera, 2023)
- React.js Essential Training (LinkedIn Learning, 2022)
- Angular and Xamarin.Forms (Pluralsight)

LANGUAGES

Dutch (native), English (professional working proficiency), Thai (beginner, spoken)

INTERESTS

Muay Thai and Brazilian Jiu-Jitsu, both competed.
